

KYIV NATIONAL UNIVERSITY OF CONSTRUCTION AND ARCHITECTURE

For 95 years, KNUCA has been Ukraine's leading higher-education institution in the sector, shaping the future of the construction industry. The university educates civil engineers, architects, project managers, ecologists, specialists in energy and environmental protection, and researchers across bachelor's, master's, and PhD programmes that integrate rigorous coursework with studio- and laboratory-based training. KNUCA also advances innovation in sustainable construction, urban development, and infrastructure modernisation nationwide.

Prof. Olena Verenych,

Acting Head of Project Management Department,
Head of the Centre of International Cooperation and
Partnership

WE OFFER

- Strong expertise in civil engineering, architecture, urban planning, and construction management
- Practice-oriented education
- Experience in urban regeneration and post-war reconstruction projects in Ukraine
- Participation in international projects and mobility schemes

NETWORKING FOCUSES

- We seek universities, municipalities, professional bodies and NGOs for joint teaching, research and real-life pilot projects in sustainable construction, urban planning, post-war reconstruction and spatial data.
- We are particularly interested in long-term partnerships that combine curriculum development, mobility, applied research and support to Ukrainian cities and regions.
