

UKRAINIAN NATIONAL FORESTRY UNIVERSITY

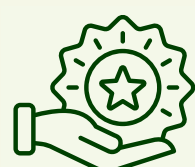

UNFU was founded in 1874 and is the only multi-level multi-functional institution of higher education in the forestry profile in Ukraine, which trains specialists for forestry and related branches of the economy of Ukraine, and conducts fundamental and applied scientific research on current sectoral and complex interdisciplinary problems of the socio-ecological and economic development of Ukraine

Project team:

Prof. Vasyl Lavnyy, Vice-Rector for Research, Professor of the Department of Silviculture, D.Sc.

Serhii Havryliuk, Associate Professor of the Department of Forest Inventory and Forest Management, PhD

Liubov Kondratiuk, Senior Lecturer of the Department of Silviculture

WE OFFER

- Expertise in forestry, forest management & ecosystem restoration, higher education
- Applied research & field-based learning formats
- Capacity for joint research projects in remote sensing, forest monitoring & green innovations
- International summer schools & mobility opportunities
- Access to professional forestry networks and partnerships across Central & Eastern Europe

WE ARE LOOKING FOR

- Universities driving sustainability transformation
- Co-creators of joint research and practice-oriented projects
- Committed partners for student & staff exchange
- Partners ready to establish long-term forest-based joint learning programs
- Co-designers of living laboratories and open-air research platforms
- Advocates for cultural heritage and traditional ecological knowledge

UNIQUE EXPERTISE & INITIATIVES

- Modernizing Master Programs to Support Forest Sector Transformation Towards Ukraine's Post-War Green Rebuilding (ForestPost)
- Joint Digital Future Project (German-Ukrainian cooperation)
- From Crisis to Resilience with Close-to-Nature Forest Management in Ukraine

- Forest surveillance with artificial intelligence and digital technologies (FORSAID), HORIZON Research and Innovation Actions
- Transformation of Pine Forests to a Close-to-Nature Forest Management in Ukraine and with special Consideration of Resilience to Fire and Climate Extremes such as Drought (RESILPINE)
- Fem2Forests. Innovative pathways for efficient involvement of girls and young women in the forestry sector

NETWORKING FOCUSES

We look for universities and partners eager to co-create teaching experiences, expand mobility opportunities, and collaborate on research and practical initiatives that advance sustainability in meaningful, real-world ways.
