

SPECTRA CENTRE OF EXCELLENCE EU COMENIUS UNIVERSITY IN BRATISLAVA

SPECTRA Centre of Excellence EU is a Central European research and training centre in the field of spatial planning, urban and regional development, and strategic socio-economic planning. The centre focuses on interdisciplinary research, development of methods and tools for sustainable spatial development, and applied projects that support public administration, municipalities and regions in responding to challenges such as climate change, digitalisation and just green transition.

Prof. Nataliia Yehorchenkova,
Head of the Project Management Subcentre at
SPECTRA CE EU

WE OFFER

- Expertise in spatial planning, urban and regional development, and EU-funded project management
- Applied research and practice-based consultancy for cities, regions and ministries
- Urban living labs, pilot projects and decision-support tools for climate-neutral and resilient cities
- Access to European and Central European networks in spatial planning, sustainability and digital innovation

WE ARE LOOKING FOR

- Universities and research institutes engaged in spatial planning, sustainability and urban transformation
- Partners for joint teaching, summer schools, BIP and staff & student mobility
- Cities, regions and agencies interested in testing AI-supported planning and decision-making tools
- Co-development of modules / micro-credentials on project management for urban transformation
- Collaboration on cross-border, green and just transition initiatives
