NATIONAL TRANSPORT UNIVERSITY

The National Transport University (NTU) was founded in 1944 and conducts scientific research and educational activities in the interdisciplinary fields of transport, construction, economics and sustainable development. NTU is a state-owned higher education institution under the jurisdiction of the Ministry of Education and Science of Ukraine and is recognised as a leading university in the field of transport. The University pays special attention to integrating the principles of sustainable development through the implementation of modern concepts of environmental engineering, energy efficiency, green transport technologies and responsible resource management. The University actively promotes sustainable development both at the scientific level, through research and innovation, and at the educational level, by training specialists capable of responding to today's challenges.

WE OFFER

- Higher education in transport and transport infrastructure
- Scientific research and various learning formats
- More than 100 educational programmes at various levels of educations
- Practice-based learning and academic mobility opportunities
- Modules on environmental engineering, energy efficiency, green transport technologies

WE ARE LOOKING FOR

- Universities committed to sustainability transformation
- Partners for student & staff exchange
- Joint research & practice-based projects
- Joint development of modules and programmes (double degrees)
- Cooperation in supporting sustainable transformation of universities
- Reliable partners for student and staff exchanges

UNIQUE EXPERTISE & INITIATIVES

A comprehensive
ecosystem approach to
education, science and
innovation in the transport
sector

NETWORKING FOCUSES

We seek universities and partners for joint teaching, mobility, and sustainability-oriented research and practice initiatives.
